DETAILED ACTION

Election/Restrictions

Newly submitted claims 41-54 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the newly submitted claims do not require "solution blended" polymers. As stated in applicants arguments, "the method of solution blending of the present invention produces a product that provides an added benefit over conventionally formed resilient polymer compositions that include reinforcing agents". Applicant also makes note of a declaration filed in the parent application that states solution blended polymers as compared to conventionally prepared rubber compositions are different.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 41-54 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3711

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 26-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15, 20-23 of U.S. Patent No. 6,710,114. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present invention and the '114 patent claim golf balls made from at least one or two polybutadiene and nanoparticles of silica. Varying the trans and/or vinyl content is within the capabilities of one skilled in the art.
